

The Transfarm project has started in December 2021. It aims at gathering an overview on the recent situation of transhumance people in Europe and especially to foster lifelong education and to acquire new skills. During 30 months the project participants are analysing case studies and will produce various online training material for practitioners.

Working Groups

W1: Summary Reports

- Selection of 5 target countries in order to involve them in the project implementation
- Workshops during Kick-off meeting to make an analysis of the current situation of transhumance
- Designing of the research instrument
- Edition of National Reports

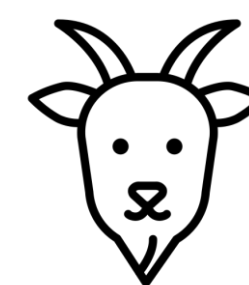

W2: Case study DATA Base

- Discussion of results and definition of the best practices for the case studies
- Analyse of a created questionnaire and selection of 15 case studies
- Interviews of the promoters of experience
- Defining of the structure of the case studies

Milestones and Timetable

Activity	Year 1 2021	Year 2 2022	Year 3 2023	Year 4 2024
PR1		Summary report		
PR2		Case study data base		
PR3			Training material	
6 Project Meetings		● ● ●	● ●	●
7 Multiplier Events				■
Final conference				●

W3: Training material

- Defining of the modules for the training system
- Development of self-evaluation tools
- Preparation of information about the current situation and the database
- Development of training material to be used on an e-learning platform
